

# **Landing Zone Immersion Day**

Lab 7 – Deleting your Landing Zone

**July 2018** 

#### Landing Zone Immersion Day Lab 7 – Deleting your Landing Zone

## **Table of Contents**

Overview	3
Delete SSO Components	
Delete Service Catalog Components	
Delete Cloudformation and StackSet Components	
Delete Master S3 Components	
Delete Logging S3 Components	
Delete Landing Zone Initiation Template	
Clean Up Organizations	5
Delete Landing Zone Config from the Parameter Store	6
Delete the Landing Zone KMS Key	
Appendix A – Access Issues	7
How do I unlock my member account to be able to switch roles from the master/primary account?	

#### **Overview**

The following process will delete a successfully deloyed AWS Landing Zone from your Organization.

If you are trying to delete the solution from and incomplete deployment, you may need to manually delete components. If you need to do so, please attempt to maintain the order outlined below.

#### **Delete SSO Components**

- 1. If you connected the directory in SSO, you MUST disconnect the directory before continuing.
  - a. Change to the us-east-1 region
  - b. Navigate to the SSO Service -> Connected Directory
  - c. Disconnect the Directory from SSO
    - i. Remove all assignments and disconnect
  - d. Switch back to your primary region

#### **Delete Service Catalog Components**

- 1. Delete Provisioned Products
  - a. Switch back to your primary region
  - b. Navigate to the Service Catalog > Provisioned Products List
  - c. Switch the View from User to Account
  - d. Terminate all Landing Zone related Provisioned Products by clicking the 3 dots next to the product and selecting 'Terminate Provisioned Product'
    - If you're not sure if the product is Landing Zone related, select the Provisioned Product and check the Portfolio is one of the following:
      - 1. AWS Landing Zone Core
      - 2. AWS Landing Zone Baseline
  - e. Navigate to Cloudformation and you should see lots of stacks deleting
- 2. Remove the Products from Landing Zone Portfolios
  - a. Navigate to Service Catalog
  - Delete the "AWS Landing Zone Core" and "AWS Landing Zone Baseline" Portfolios
    - i. Delete all Constraints
    - ii. Delete all Users and Groups
    - iii. Remove the product from the portfolio
    - iv. Navigate to the Portfolios List
    - v. Delete the portfolio

- 3. Delete the Landing Zone Products
  - a. Navigate to Service Catalog
  - b. For each product in "Products List" i.e. "AWS Centralized Logging Solution" and "AWS-Landing-Zone-Account-Vending-Machine"
    - i. Delete Product

## **Delete Cloudformation and StackSet Components**

- 1. Delete all CloudFormation Baseline Stacks
  - a. Navigate to Cloudformation
  - b. Select all stacks with "SO0045" in the description.
  - c. Delete Stacks. These can be done in parallel.
  - d. Wait till these stacks have all completed.
- 2. Delete the Security Baseline for each account via StackSets in the Master Account
  - a. Navigate to Cloudformation StackSets
    - I. Delete the following StackSets in parallel
    - II. AWS-Landing-Zone-Baseline-EnableCloudTrail
    - III. AWS-Landing-Zone-Baseline-EnableConfig
    - IV. AWS-Landing-Zone-Baseline-EnableConfigRules
    - V. AWS-Landing-Zone-Baseline-EnableNotification
    - VI. AWS-Landing-Zone-Baseline-IamPasswordPolicy
    - VII. AWS-Landing-Zone-Baseline-PrimaryVPC
    - VIII.AWS-Landing-Zone-Baseline-SecurityRoles
- 3. For the remaining StackSets which will still have stack instances, you will need to Manage Stacksets, enter the account numbers and regions, and delete all stack instances. Once the stack instances have been deleted, delete the StackSets as follows.
  - a. Delete Instances in StackSet "AWS-Landing-Zone-SharedTopic"
    - i. Delete the StackSet.
  - b. Delete Instances in StackSet "AWS-Landing-Zone-SharedBucket"
    - i. Delete the StackSet.
  - c. Delete Instances in StackSet "AWS-Landing-Zone-SecurityRoles"
    - i. Delete the StackSet.
  - d. Delete Stack Instances in StackSet "AWS-Landing-Zone-PrimaryADConnector"
    - i. Delete the StackSet. Wait for this to complete.
  - e. Delete Stack Instances in StackSet "AWS-Landing-Zone-PrimaryAccountVPC"
    - i. Delete the StackSet.
  - f. Delete Stack Instances in StackSet "AWS-Landing-Zone-SharedServicesRDGW"
    - i. Delete the StackSet.
  - g. Delete Stack Instances in StackSet "AWS-Landing-Zone-
    - SharedServicesActiveDirectory"
      - i. Delete the StackSet.
  - h. After the RDGW and AD StackSets have been deleted
    - i. Delete Stack Instances in the StackSet "AWS-Landing-Zone-SharedServicesAccountVPC"

ii. Delete the StackSet.

#### **Delete Master S3 Components**

- 1. Delete the following S3 buckets in the Master Account
  - a. Navigate to the S3 Service
  - b. Delete the following buckets
    - i. aws-landing-zone-configuration-<accountid>-<region>
    - ii. initiation-landingzonepipelineartifactss3bucket\*

#### **Delete Logging S3 Components**

- 1. Delete the Logging Bucket in the Logging Account (Note: In case you have locked the StackSet Execution Role, follow steps on Appendix A)
  - a. Switch role to the Logging account
  - b. Navigate to S3
  - c. Delete the following buckets
    - i. aws-landing-zone-logs-<accounted>-<region>
    - ii. aws-landing-zone-s3-access-logs-<accounted>-<region>
  - d. Switch back to the primary account

#### **Delete Landing Zone Initiation Template**

- 1. Delete the Landing Zone initiation template
  - a. Navigate to CloudFormation
  - b. Select the Initiation stack
  - c. Delete the stack
  - d. If there are issues with deletion of resources, delete them manually and retry the stack deletion until successful

#### **Clean Up Organizations**

- 1. Clean up Organizations
  - a. Move the following accounts out of the Core OU back to Root
    - i. Primary
    - ii. Shared Services
    - iii. Logging
    - iv. Security
  - b. Delete the Core and Application OUs
  - c. Detach and delete the Service Control Policy

#### Landing Zone Immersion Day Lab 7 – Deleting your Landing Zone

i. protect-cloudtrail-config

## **Delete Landing Zone Config from the Parameter Store**

- 1. Delete all the Landing Zone SSM Parameters
  - a. Navigate to Systems Manager -> Parameter Store
  - b. Delete all parameters

#### **Delete the Landing Zone KMS Key**

- 1. Ensure the Landing Zone KMS Keys have been deleted
  - a. Navigate to IAM -> Encryption Keys
  - b. Delete the key if you want to remove LZ permanently
  - c. If you plan on reinstalling LZ, DO NOT REMOVE THE KEY

#### Landing Zone Immersion Day Lab 7 – Deleting your Landing Zone

#### Appendix A - Access Issues

How do I unlock my member account to be able to switch roles from the master/primary account?

- 1. Reset the root password for the Security account
- 2. Login to the Security account using root credentials.
- 3. Navigate to the IAM console and click on the role "AWSCloudFormationStackSetExecutionRole".
- 4. Click on the "Trust Relationships" tab.
- 5. Click on the "Edit Trust Relationships" button.
- 6. Edit the principal to "arn:aws:iam::MASTER\_ACCT:root" (this will unlock the account, and you will be able to switch from the master/primary account)
- 7. Use Security account to switch role to "Shared Services" and Logging" account using role name "AWSLandingZoneAdminExecutionRole" and perform Steps 3-6 for each account.
- 8. Logout of Security Account and log back into Master account to continue deletion process.
